

# The Seventh International Workshop on Coastal Disaster Prevention

## Tsunami Disaster Preparedness considering Restoration and Rehabilitation

Even after the Indian Ocean Tsunami, we had many tsunami disasters in the world including those in Java (2006), Solomon (2007), Sumatra (2007), Samoa(2009), Chile (2010) and Sumatra (2010). This workshop will be the seventh in a sequence of technical specialty workshops to discuss disaster mitigation in coastal areas.

In the workshop we will discuss tsunami disaster preparedness considering restoration, rehabilitation, and reconstruction after a disaster. Lessons learnt from the recent tsunami disasters and advanced preparedness of local governments will be introduced in the workshop.

Date: January 26 and 27, 2011

Place: Kokuyo Hall (Shinagawa Station, Tokyo)

All people are invited to attend the workshop (Free).
